

Having fun on the snowtubes is an all-aged activity, thrilling and safe. Children and adults can enjoy continuous and entertaining slides on the tracks.

Neveplast presents its snow tubes: strong, handy, and comfortable.

Neveplast snow tube is a very appreciated product: different colors for the bottom as well as for the fabric, handles with steel rings for a longer duration, possibility of personalization with writing or logos of the customer, available in two models standard or maxi.

The hard bottom allows an high slipperiness. The inner tube and the soft cushion, which has to be positioned in the inner bottom, make the snow tubes very comfortable.

They can be used both on tracks made by snow and on Neveplast Tubby slopes.
