

365 days of fun

TUBBY IS SPEED!

Snow Tubing for all seasons and all ages! Seated in a Neveplast Tube you will slide down an engineered structure entirely covered with our revolutionary material, which guarantees a smooth ride. TUBBY is pure adrenaline and totally safe.

TUBBY IS INNOVATION!

Thanks to its ability to attract and entertain adults and children of all ages, TUBBY has long been chosen by large businesses specialized in entertainment all over the world. This has been proven with installations at amusement parks, water parks, shopping centres and beaches.

TUBBY IS PRACTICAL!

Extremely modular and can be easily positioned on any type of structure and/or ground.

TUBBY is a new attraction for amusement parks and recreational facilities, in general.

TUBBY IS EFFICIENT!

High hourly transport capacity guarantees considerable income and very short amount to pay back. The TUBBY slope does not require irrigation and/or electricity to operate, thus reducing operating costs and ensuring maximum comfort to customers.

**ENJOYMENT
WITHOUT LIMITS!**
With Tubby Neveplast
You can really fly.

SKIDDY IS ADRENALINE!

SKIDDY is the revolutionary new flooring that transforms a simple Kart track into an amazing experience. SKIDDY allows you to have fun with skidding, drifting, and counter-steering, as on snow.

SKIDDY IS DRIFTING!

SKIDDY allows experienced drivers, beginners and children to feel the sensation of drifting and counter-steering. With SKIDDY, Karts are no longer just racing against the clock, but become a great activity suitable for families and people of all ages.

SKIDDY IS EFFICIENT!

The tracks can operate in any location, indoors or outdoors. We already operate in amusement parks, shopping malls, ski resorts, hotel resorts, and beaches.

The temperature is no longer an issue with SKIDDY and it can be used anywhere safely with very low operating costs.

SKIDDY IS PRACTICALITY!

Unlike traditional Kart tracks, SKIDDY tracks opt for smaller tracks. The special SKIDDY flooring consists of modular panels, which give the possibility of developing various kinds of tracks at a very low cost compared to traditional Kart tracks. SKIDDY installations are feasible on any compacted and homogeneous surface, and the karts can be both electric or gas engines.
